We have handled headline rarities, modest accumulations, and thousands of coins, tokens, medals, and miscellany that fall in between.

Simply put, we need collections in order to keep offering coins, tokens, and medals to collectors.

We have handled specialized collections with a narrow focus, and large diverse collections of coins, tokens, and medals that range across a wide variety of numismatic fields. We bring our love for coins to our work, and we have developed a print and internet market that presents your collection to coin lovers around the globe.

We have the wherewithal to buy your collection if the delay and uncertainty of an auction is not your choice. We can present your material in a way that will excite interest—careful cataloging, expert photography, and our expertise from over four decades in business.

The process is straightforward. We can travel to see you and your collection if that is the best approach. Or we can help you arrange shipping, with our insurance covering it while it is in transit (and all the time it is in our possession as well).

We are not the only firm seeking consignments. We are one of the few that pay strong attention to the lesser material that is a part of most collections. And when you deal with us you are always dealing with a key specialist and partner in the firm.

Our firm has been a member of the International Association of Professional Numismatists—the premier world numismatic professional association—since 1988. With the addition of our son Lief nearly a decade ago you can expect continuity as well as an internet presence that will continue to be at the forefront of modern technology.

Please call, email, or write if you have any questions about the process. And certainly, please consider us to take great care and approach your collection with appreciation and a commitment to helping you get back a strong return.

Terms of this auction (Bidding constitutes acceptance of these terms)

1. **Website:** Use of our website (www.davcoin.com) is dependent on acceptance of these terms. We reserve the right to revoke any bids and registrations, restrict access, and modify or disable the site or any of its features, including any specific auction or web store lot(s), at our discretion. We also do not make any guarantees regarding accessibility, accuracy, or security of this website with regard to registration and bidding. However, connections to this website are encrypted via SSL, and any payments processed through this website are handled on a separate server by a secure third party payment processor, in compliance with PCI data security standards.
2. **Bidders and Registration:** Once placed, all bids are final. Lots will be sold to the highest bidder. Bidders personally guarantee that they will pay for their winning bids. If you are a new bidder in our sales, please provide numismatic credit references or include a 25%-of-total-bids deposit with your bids. If bidding by internet, please register and provide the requested information. Client data is kept confidential; we do not share our mailing list or client information unless authorized. In addition to internet bidding, you may bid by mailing the bid sheet included with each catalog, or by email, fax, or telephone. If you choose to telephone your bids, we appreciate a written follow-up. Our practice is to always read back telephone bids and ask for confirmation. So far, we have had no problems with this approach. If you have special instructions such as limits on total expenditures, please talk with us.

   We will always respond to emails within one business day during auctions! If you do not get a reply, we did not get your email. Try again!
3. **Bid Processing:** Bidding through our website will allow instant feedback of the success of any bid. We will enter bids that come in by any of the non-website methods listed above as soon as possible during normal business hours, Monday to Friday, 9 A.M. to 5 P.M. Central Time. On the closing day of an auction the office will open at 8:00 A.M. Central Time. Bids that come from email, telephone, fax or bid sheet will not usually be posted outside of office hours, so any internet feedback you get outside of regular office hours may not reflect this other bidding. We recognize that many people prefer the phone-fax-email-personal approach to bidding. We will accept bids submitted in this fashion until 9:00 A.M. Central Time on the day of the sale. There is NO extra charge for bids submitted by mail, telephone, email, or fax.
4. **Bidding Restrictions:** Please note, we reserve the right to determine opening prices, advances, acceptability of bids and bidding registrations, to bid on our own account, or to withdraw any lot. In case of dispute, we reserve the right to reopen the lot. Bids below the opening amount, typically 80% of the estimate, will not be accepted for online bidding. However, we have always been willing to consider bids below the opening level, or even below reserves, after the sale closes on a case-by-case basis. We work closely with consignors in establishing price levels, reserve levels, and asking prices for lots we offer in an aftersale. Our general consignment terms allow an 80% of estimate level for the consignor so that any coin not reaching this level can be claimed back by the consignor with no charge.
5. **Lot Closing:** For bidders online, lots will be closing every 40 seconds unless a bid is placed during that last 40 seconds. In that case, the bidding window will reset to 40 seconds. Lots will close sequentially, not simultaneously, meaning that no subsequent lots will begin to close until the current lot is closed. Allan, Marnie, and Lief will be available by telephone during most office hours but particularly during the week the sale closes. Keep in mind that last minute calls may not get through. We will attempt to call back if you leave your number. Allan has found in bidding online in other sales that establishing a reasonably strong limit usually brings success and frequently at less than his maximum.

   In general, bid strongly on lots you particularly want. Your final price will be one advance beyond the next highest bid. Also please note, we do NOT charge a buyer's fee, so the price you win the lot for will be the price you pay, plus any charges for shipping or payments made with a credit card (see 7. Payments and Invoicing).
6. **Estimates:** We have estimated conservatively, assigning values that we believe reflect the moderate end of current price ranges. Some lots have reserves. In no case is a reserve higher than the estimate. We will not enter bids for less than the opening of the lot (typically 80% of the estimate), though we will consider them at the end of the sale for unsold lots.
7. **Payment and Invoicing: THERE IS NO BUYER'S FEE!** Please bid in US dollars. Payment should be in US dollars or British pounds by check, money order, wire, or direct deposit into our Barclay's sterling account (details provided to all United Kingdom buyers and to others on request). We will determine the pound rate at the time of invoicing based on reported rates. We also accept MasterCard and Visa, both over the phone and through our website. However, following the practice of other firms who find, as have we, that collections and fees add to the overhead of these sales, we will add a 3% administration charge to all credit card invoices (pursuant to Minnesota Statute 325G.051) and to invoices unpaid after 30 days. We will follow the billing instructions you note on your bid sheet or at the time you bid. We can work out a time payment schedule if that is necessary—please ask about this option before bidding.

   If you are paying in British pounds, the rate used will be based on the effective exchange rate, £ to $, at the time of billing. Bids must be placed and will be processed in US dollars. We will invoice in both US dollars and British pounds for any client who requests it. Sterling payments will be made directly to our sterling account.
8. **Payment and Delivery of Lots:** Invoices will be sent to online bidders by email soon after the sale, and by regular U.S. mail to people for whom we have no email address, or who bid via mail, phone, or fax. Payment is due on receipt of invoice. Packing and shipping costs will be added to all invoices. U.S. buyers will receive lots by U.S. Priority or Express mail, fully insured. Shipments outside the United States (including to Canada) are sent insured by U.S. Priority Mail International, FedEx, or DHL. Buyers outside the United States should provide any special shipping instructions. All shipments outside the United States are sent at the buyer's risk but we make strong efforts to get your items to you. Packages valued over $50,000 will require special arrangements which we will make with you after the sale. We carry insurance on material we mail out of the United States and will seek reimbursement for lost or damaged items. In two decades of running these sales, we have yet to have a problem with shipping we could not resolve though there is a short list of countries (non-Euro zone) to which we will not ship.
9. **Authenticity:** This is an auction sale, not an approval sale. All lots are guaranteed to be genuine and as presented online. Any claims, other than claims of authenticity, must be made within three days of receipt of lots. N.B. Attribution and condition are the opinion of the cataloger and no warranty is expressed or implied. Conflicting opinions about grade by grading services do not constitute a valid basis for return. Our experience is that the U.S. grading services typically do not understand the grading of coins made with extensive hand work. Authenticity claims must be supported by the judgment of recognized professionals or services such as that provided by the I.A.P.N. (In 2008 we returned an electrotype of a Cromwell crown that was slabbed as "genuine" by NGC.) In any event, our maximum liability for any item or dispute is limited to the actual amount paid for the item.
10. Title does not pass until items are paid for in full.
11. Lots sent to Minnesota addresses will have State Sales Tax (7.125%, or the recipient's local rate) added to the invoice unless you have provided a Minnesota resale number.
12. While these terms are current, they are subject to change at any time. The version posted on our website (davcoin.com/terms) will always be the most current version, and in cases of conflict supersedes any version printed elsewhere. Bidding or using our website after we have revised the Terms of Use constitutes acceptance of the revisions, and you will be bound by the revised Terms of Use.
13. There is an informality about these terms that is based on our belief that pages of fine print can never cover every eventuality and that in the final analysis, rules of reason and decency must prevail. Most of the people who take part in our sales have done business with us in the past and we have been able to work out any issues that come up in a friendly and equitable manner. We look forward to making our current and future auction sales a pleasant and enjoyable experience for you and for us.

With NO BUYER'S FEE in this sale you can bid an actual price to pay.

Opening Thoughts

Most collections have "odds-and-ends" that have been acquired along the way—early acquisitions, impulse buys, exploring different collecting directions. One of the great appeals of coin collecting is the almost limitless variety that is available. There are many different reasons why most coin collections include runs or groups of less expensive material after all the main items have been accounted for.

Some of this catalog reflects this. Nearly a third of the sale is from the Pat Zabel collection that anchored our major March sale. Several gold pieces, Greek and Roman coins, Saxon material along with more Spanish American material, coins of Guatemala, a few scarce Mexican Revolutionary pieces and more. All of these are coins that he chose carefully acquiring high quality examples of pieces that have moderate catalog values. There are condition rarities here—low value coins can be particularly difficult for collectors to find simply because they don't command the attention that major rarities enjoy.

Greek coins from several well put-together collections that we introduced in the March sale anchor the ancient section of the sale. Day-to-day base metal coins of the ancient eras are also represented with appealing examples from other consignments, most notably the special Roman Republic denarii.

The British section offers a variety of hammered and milled coins including something a bit unusual—a partial date run of Jubilee Head crowns of Victoria, something that happened by chance as we assembled this catalog from different consignors.

The D&H tokens are mostly high-quality examples from the collection of tokens created for actual commercial use that we began in our March auction. I have added references to the beautifully produced 2014 book by Jon Lusk, *British and Irish Tradesmen and their Copper Tokens of 1787-1804*. The other two references that identify and comment on the "real commercial use" tokens are the works by Waters (1954) and Bell (1963).

I have also included the source names and dates of purchase for all the tokens from this collection. It provides a fascinating look at token activity in the last decades of the 20th century.

The sale continues with the Zabel Spanish American material, other foreign coins and some groups of high-quality United States silver dollars from a crown collection we have been handling as well as an encased postage stamp, a "necessity coinage" that also carried an advertisement.

Then, almost as a postscript, check out the eight large lots, estimated at wholesale levels. Photos are online. The huge collection of world crowns consists of fully catalogued pieces with the description, KM number and actual silver weight noted on each. The complete list is online but we can send a print copy—just ask.

Pat Zabel's wide-ranging interests covered Eastern areas including Ancient India, Scythian and Indo-Bactrian kingdoms, Cilician Armenia, and Judaea, and some of those collections are included here. (Look for the balance of his collection in our August sale.)

Every large lot in this section has substantially more value than the estimate suggests.

Best wishes for the coming spring and summer. For many of us in the USA this year, winter has been particularly challenging. The coming spring seems all the sweeter.

The ancient city of Zankle, named for its sickle-shaped natural harbor, was a settlement of great antiquity on the northeast tip of Sicily. It was renamed Messana by Anaxilas, tyrant of Rhegion. In about 288 B.C. a force of Oscan mercenaries, the Mamertinoi, attacked Messana and massacred the inhabitants. They ruled the city until the Romans won the island in the Punic Wars. The tyrants of Sicily had always employed mercenaries, often hired in Campania and Central Italy. In a land famed for its sweeping landscapes, ideal for the breeding of strong horses, the emergent Campanian nobility developed their renowned cavalry. Carrying heavy javelins for skirmishing and swords for melee, they used speed, agility, and flexibility of tactics to inflict damage on more heavily armed and therefore more slowly moving opponents. When King Agathocles of Syracuse died, many of his strong young mercenaries refused to leave Sicily and captured the Greek city of Messana in circa 288. They adopted the name of their war god Mamers, Oscan for Mars, often fighting like pirates and plundering the neighboring districts. Their activities which finally engaged the Romans against the Carthaginians set off the First Punic War (264-241 B.C.).

Purchased from CNG.

Described by Cicero as "the first man of Greece," and held by the French intellectual Montaigne as "one of the worthiest (men) that ever lived," Epaminondas was the general, military strategist, and statesman of Thebes who successfully led the Boeotians against the invading Spartans at the battle of Leuktra in 371 B.C., thus ending their nearly three centuries of military supremacy. Tragically, he was killed in 362 B.C. at the battle of Mantineia while fighting in the phalanx, by a javelin in his chest thrown by Gryllos, son of the historian Xenophon. His death left Thebes without the leadership needed to resist Philip II of Macedon, thereby changing the course of history.

Purchased from David Sear.

Lepidus was a loyal colleague of Julius Caesar, who in fact had dined at his home the night before he was assassinated. But he joined the triumvirate of Octavian and Antony until sidelined. This issue commemorates the founding of the Second Triumvirate, and was probably struck from funds raised preparing for the campaign against Brutus and Cassius in 42 BC. Lepidus bears the title Pontifex Maximus, an office he received after the assassination of Julius Caesar and held until he died in 12 BC.

Son of the popular war hero Germanicus and the grandson of Augustus, Caligula nevertheless has gone down in history as the most debauched, cruel, and tyrannical of the Roman emperors. His mother Agrippa the Elder blamed Tiberius for the death of her husband Germanicus, and he responded by imprisoning and executing her and her two children, Nero and Drusus Caesar. He raised her youngest son Caligula, exposing him to acts of cruelty and debauchery. After Tiberius died, Caligula ruled for just four years, becoming increasingly cruel and erratic, perhaps from an illness, before being assassinated by the Praetorian Guard at age 29.

Wikipedia has a fascinating article on the "Stafford knot." Myth has it that it began when a hangman challenged by the need to hang three criminals devised this as an "all-at-once" solution. Later discussion is less grisly. A later speculation suggests it as an imported Celtic Christian symbol brought by monks from Lindisfarne. In any event, by the 15th century the knot had become (and continues to be) a symbol of Stafford.
